Caribbean countries should place emphasis on the following:

**EARLY TESTING AND TREATMENT**
- Early testing and treatment for HIV and syphilis for all pregnant women and exposed infants

**HEPATITIS B TESTING**
- Hepatitis B testing for all pregnant women, provision of birth dose within 24 hours for all neonates and subsequent Hepatitis B vaccines

**QUALITY LAB SERVICES**
- Quality laboratory services which include proficiency testing

**SURVEILLANCE**
- Adequate surveillance in place to capture and monitor cases

**HUMAN RIGHTS, GENDER EQUALITY AND COMMUNITY ENGAGEMENT**
- Interventions and programmes should meet the Human Rights, gender equality and community engagement requirements
