ADVOCATE

Continue to advocate for PrEP service delivery as part of comprehensive combination prevention (CCP).

WHAT IS CCP?

PrEP + counseling (by phone) + condoms + lubricants = CCP

CLIENTS + PREP

Several months of PrEP from initiation should be given to committed clients.

USE A PHONE

Use a phone to follow-up one month after starting clients on PrEP - this remains essential. Or conduct follow-ups outside of clinic space to decrease facility congestion.

COMMUNICATE

Inform clients where services can be accessed as services are decentralized from clinics. Ensure clients have your contact information.

DECENTRALIZATION

Move PrEP services away from and out of clinics as much as possible.

CONTINUED ON THE NEXT PAGE
7 VIRTUAL OPTIONS
Use cellphones, Skype, Zoom and other virtual options for client initiations, refills and check-ins.

8 COMMUNITY DELIVERY
Decentralise dispensing of PrEP through community delivery.

9 MMD
Move to multi-month dispensing (MMD) as much as possible.

10 ADHERENCE REMINDERS
Use SMS/text messaging or WhatsApp for refill and adherence reminders.

11 PREP UPTAKE
Community leaders and mentors can continue to encourage PrEP uptake using social platforms (WhatsApp, Facebook, Instagram).
