

TECHNICAL GUIDANCE

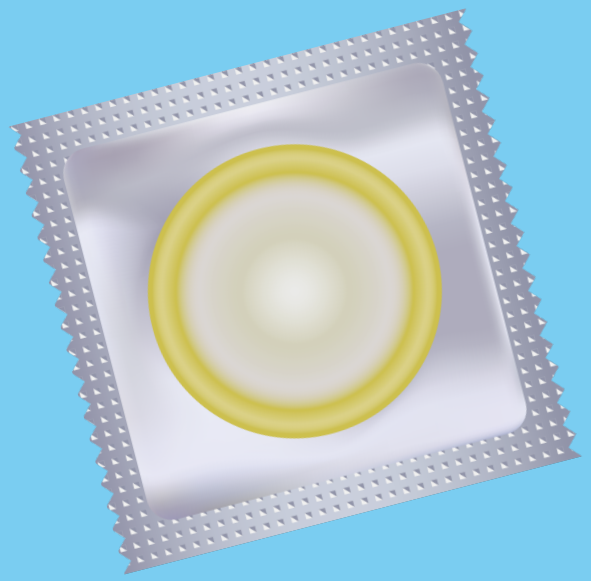

HIV Prevention during COVID-19 Pandemic

HIV PREVENTION

INCREASE SUPPLIES

Increase condom and lubricant supplies for upsurge in demand.

MINIMIZE CLIENTS' VISITS

Minimize clients' collection visits by packaging condoms and lubricants in larger amounts (akin to multi-month dispensing of ARVs).

NON-TOUCH DISTRIBUTION

Create non-touch distribution points with clear labels (e.g. do not place condoms in bowls)

CLEAN SUPPLIES

Clients should clean supplies and wash hands after returning home.
